Dear Mr. Weisberg,

I just picked up a copy of "Case Open." What a breath of fresh air! I was greatly offended by Posner's book, the highly overrated publicity and the presumptuous title, "Case Closed." (What rot!) To see that you were the author of this book's antithesis warmed my heart. I consider you a pioneer and a (largely unsung) hero for your undaunting work over 30 years on this tragedy. I write you to obtain a price-list for your previous books which are listed in Case Open and I'm interested in any details you can provide for your next book, "Never Again."

Also, I've included two bookplates

(over)

which I hope I could trouble you to sign for my book collection.

I'm greatly interested in your opinions of Dick Russell's large well-documented tome, The Man Who Knew Too Much (on Richard Case Nagell) and on Steve Rivele's investigation on the three hired Corsican assassins. I also wonder if by now, you have a good idea who orchestrated the assassination and headed the coverup (and why).

Your work is important and essential to all serious 'aficandos' present and future. I hope you're in fair to good health and wish you publishing success with these books. Thanks for your attention.

Sincerely,

Peter Bolton
